WHO WE ARE ?

Delta Leonis Building Solutions is a pioneer in safety and security systems, offering a comprehensive range of fire protection and security solutions. Our products include fire extinguishers, hydrant systems, sprinklers, and advanced fire alarm systems designed to suit diverse industrial, commercial, and residential requirements.

Understanding the critical importance of early fire detection, we provide cost-effective to sophisticated fire alarm systems that ensure quick response and effective crisis management. To address growing security concerns, we deliver reliable CCTV surveillance and access control systems that offer 24/7 protection for your property.

We also specialize in evacuation and crisis management solutions, including photoluminescent and illuminated exit signage, along with professional fire safety training programs focused on evacuation procedures and first aid. At Delta Leonis Building Solutions, safety, reliability, and preparedness are our top priorities.

10+ Years Experience

500+ Clients

Expert Technical Team

OUR MISSION

To safeguard life, property, and business continuity through dependable safety and security solutions.

OUR VISION

To emerge as a trusted national leader in integrated fire and security systems.

OUR STRENGTHS

Powered by global sourcing, in-house logistics, expert consultation, and complete turnkey project execution.

OUR CORE SERVICES

1. ANNUAL MAINTENANCE CONTRACTS (AMC)

Annual Maintenance Contracts Preventive Regular Checkups Breakdown Calls Consulting for Cost effective solutions Training Auditing Mock Drill. Erectionv.

2. PREVENTIVE & REGULAR CHECKUPS

Our preventive and regular checkup services ensure that all safety and security systems function at peak performance. Through scheduled inspections, testing, and maintenance, we identify potential issues early and prevent unexpected breakdowns. This proactive approach enhances system reliability, extends equipment life, and ensures continuous safety and compliance.

3. BREAKDOWN & EMERGENCY SUPPORT

We provide prompt and reliable breakdown and emergency support services to ensure your fire and security systems are restored quickly during unexpected failures. Our dedicated technical team responds swiftly to diagnose issues, carry out necessary repairs, and minimize downtime.

4. CONSULTING FOR COST EFFECTIVE SOLUTIONS

Expert assessment and planning to deliver optimized safety and security systems that meet compliance while staying within budget.

OUR CORE SERVICES

5. FIRE SAFETY TRAINING

We provide essential fire safety training to help individuals understand fire hazards, evacuation procedures, and the proper use of firefighting equipment. Our program builds awareness, confidence, and preparedness to handle emergencies safely and effectively.

6. SAFETY AUDITING

Our Safety Auditing services help identify potential risks and ensure your fire and security systems comply with safety standards and regulations. Through detailed inspections and assessments, we evaluate system performance, highlight gaps, and recommend corrective actions to enhance overall safety and reliability.

7. MOCK DRILLS & EVACUATION PLANNING

We organize mock drills and create clear evacuation plans to prepare occupants for emergencies. This ensures quick response, safe evacuation, and improved overall safety awareness.

8. SYSTEM ERECTION & COMMISSIONING

We provide professional system erection and commissioning services to ensure all fire and security systems are installed correctly and operate efficiently. Our team handles complete setup, testing, and final verification to guarantee reliable performance and compliance with safety standards.

FIRE SAFETY SYSTEMS

We provide complete fire safety solutions to protect your people and property. Our services include fire alarms, sprinklers, hydrant systems, extinguishers, smoke detection systems, and safety signages. From design and installation to maintenance, we ensure reliable and standard-compliant fire protection for your building.

FIRE SAFETY TRAINING

We provide practical fire safety training to help your team respond quickly and safely during emergencies. Our program covers fire prevention, evacuation procedures, and proper use of firefighting equipment, ensuring a safer and well-prepared workplace

FIRE ALARMS

We provide advanced fire alarm systems that detect smoke or fire at the earliest stage and alert occupants immediately. Our reliable and standard-compliant solutions ensure quick response, enhanced safety, and complete protection for your building.

FIRE EXTINGUISHERS

We supply high-quality fire extinguishers suitable for different types of fire hazards. Our solutions ensure quick and effective fire control, helping to protect lives, property, and maintain safety compliance.

FIRE HYDRANTS

We provide efficient fire hydrant systems designed for quick and reliable firefighting support during emergencies. Our systems ensure strong water flow, easy accessibility, and compliance with safety standards to protect your property and occupants.

FIRE SPRINKLERS

We provide practical fire safety training to help your team respond quickly and safely during emergencies. Our program covers fire prevention, evacuation procedures, and proper use of firefighting equipment, ensuring a safer and well-prepared workplace

SAFETY SIGNAGES

We provide practical fire safety training to help your team respond quickly and safely during emergencies. Our program covers fire prevention, evacuation procedures, and proper use of firefighting equipment, ensuring a safer and well-prepared workplace

ASPIRATING SMOKE DETECTION SYSTEM[VESDA]

We provide advanced fire alarm systems that detect smoke or fire at the earliest stage and alert occupants immediately. Our reliable and standard-compliant solutions ensure quick response, enhanced safety, and complete protection for your building.

WATER LEAKAGE DETECTION SYSTEM

We supply high-quality fire extinguishers suitable for different types of fire hazards. Our solutions ensure quick and effective fire control, helping to protect lives, property, and maintain safety compliance.

PERSONAL PROTECTIVE EQUIPMENTS

We provide efficient fire hydrant systems designed for quick and reliable firefighting support during emergencies. Our systems ensure strong water flow, easy accessibility, and compliance with safety standards to protect your property and occupants.

SECURITY SYSTEMS

We provide end-to-end, fully integrated security system solutions designed to safeguard people, property, and critical assets across residential, commercial, industrial, and institutional environments. Our advanced CCTV surveillance systems offer high-definition video monitoring with real-time viewing, recording, and remote access capabilities, ensuring continuous 24/7 surveillance and incident tracking. These systems help deter threats, improve visibility, and support quick decision-making during security events.

Our access control systems are designed to regulate and monitor entry and exit points with precision, allowing only authorized personnel to access restricted areas. From card-based and PIN-enabled systems to advanced biometric authentication solutions such as fingerprint and facial recognition, we ensure secure, accurate, and tamper-resistant identity verification.

In addition, our burglar alarm systems provide instant alerts in the event of unauthorized access, intrusion, or suspicious activity, enabling immediate response and minimizing potential losses. Video door phone systems add another layer of protection by allowing visual and audio communication before granting visitor access, enhancing both safety and convenience.
